- in Jacky (Jiajin) Zheng

Profile

- A Full-stack developer with one-year hands-on experience with multiple projects.
- Experience in creating **REST** web service using **Java** and **Spring Boot** Framework. Understand of the server site architecture and design pattern. Experience in Implementing **AWS Solutions**.
- Strong understanding in **React**, **Javascript**, **Sass**, **CSS** and **HTML** for web application development. Hold strong passion about following the SOLID design principles in writing better quality codes.
- Over 3 years of experience in tutoring and 1 year of experience in a start-up project within a cross-disciplinary setting.
- A fast learner with determination and inquisitive mindset.
- An effective team player with excellent oral and written communication skills.

Education

- 🏫 2018 — 2019 **The University of Melbourne**
Master of Engineering (Biomedical)
Academic Achievement: Second Class Honour A

- 🏫 2015 — 2017 **The University of Melbourne**
Bachelor of Biomedicine
Academic Achievement: Second Class Honour A
Recipient of 2016 Melbourne Global Scholars Award

Technical skills

- **UI Technologies & Programming languages:** JavaScript, HTML5, CSS3, Sass, Java, Python, C
- **Libraries & Frameworks:** React, Redux, Router, Styled-Component, JQuery, Spring Boot, Node.js, Express
- **Web Services Technologies:** Axios, REST, JSON, JWT
- **Unit Testing Tools:** Junit, MockMvc, Mockito, Jest, Jest-dom
- **Database:** MySQL, MongoDB, H2 In-memory database
- **Messaging Brokers:** RabbitMQ
- **Version Control & Development Tools:** Agile, Scrum, TDD, Git, Github flow
- **Cloud Services & CICD:** AWS (S3, Route 53, IAM, EC2, SES, API Gateway, Lambda), Travis CI

Relevance Experience

- 🏫 Feb, 2020 — Present

School Management System

- Experienced in **MVC** and **Layered Architecture** with **Java** and **SpringBoot**.
- Implemented user authentication with **JWT** to prevent unauthenticated and unauthorised user.
- Integrated file transferring features using **AWS S3** as a programmatic **IAM** user with **AWS-SDK** and **presigned Url**.
- Experienced in containerising the project using **Docker** and implemented **CI** with **Travis CI**.
- Experienced in **Agile** development using **Scrum**. Used **Github flow** as the development workflow.
- Writing unit tests with **Junit**, **MockMvc** & **Mockito** and using **H2** In-memory database, Understanding of **TDD**.
- Worked with **MapStruct** and **Lombok** to improve productivity. Documented and tested **REST API** with **Swagger UI**.
- Involved in designing **MySQL** database and experienced with **Spring Data JPA**.
- Implemented automatic email forwarding using **AWS SES** for sending user registration information to the user email.
- Refactored code for the compliance of code standard using **static code analysis** tool and better performance.
- Involved in the process of running **Docker Images** as on **AWS EC2** Instance.
- Designed and built **UI & React component** from scratch for the front-end of the application.
- Used **React-Redux** for state management and **React-Hook**, **CSS Media Query** for **responsive** features.
- Consumed **REST API** for **CRUD** operation with **JSON** data transferring. APIs were called using **Axios**.
- Wrote unit tests with **Jest** and **React Testing-library** for ensuring productivity and providing documentation for co-workers. Type checking was also achieved using **PropTypes** library.
- Awarded **2nd Place** in JR ACADEMY Full-stack Bootcamp 10th Commercial Project Competition.

Sudoku Solver Project

- **Single page app** that solves any provided sudoku puzzle implementing **AWS solutions**.
- Frontend was built using **React**, **Styled-Component** and **Material-UI**.
- Deployed an **API** endpoint using **AWS API Gateway**. Puzzle solving algorithm was built using **Python** and hosted on a **AWS Lambda function**.

Weather Web Application Project

- A weather app implemented modern interactive functionalities including searching weather for different locations, bookmarking favourite location and viewing historic weather information.
- Designed and built a **UI/UX** with **React** and **Sass module**. Implemented responsive with **CSS Media query**.
- Fetched data as **JSON** via third party **REST API** and experienced in handling **Promise**.
- Used state management tool **React-Redux** to manage and display weather information across multiple components.

📅 Dec, 2019 — Mar, 2020

Personal Website Project

- Created a responsive single page personal website using **HTML/Sass/Javascript**. Carry out **BEM** convention.
- Added an interactive background using **Particles.js** and implemented smooth navigation using **Swiper.js**.
- Experience in **Google Maps Embed API**, **Google Analytic** and **reCAPTCHA api** for website authenticity.
- Deployed website onto **GitHub Pages** for fast integration and deployment. Used **CNAME** for the custom domain.

📅 Nov, 2019 — Dec, 2019

Single Page Retro Games & CSS Animation

- Created retro games such as Snake, Tetris and 2048 that can be run directly on browsers using Vanilla **JavaScript**. Better mobile compatibility and performance were considered.
- Created highly reusable modern eye catching **CSS3** animation such as carousel, parallax and 3D card flipping.

Responsive and Accessible Web Pages

- Created responsive web celebrity tribute page. Used semantic **HTML5** tags to emphasise accessibility.
- Created demo product landing page using **Bootstrap**. Implemented **Google analytics** service for website traffic tracking.

Other Experience

● 📅 2017 — Present

📍 Dockland, Melbourne

Senior VCE Tutor

- Currently providing physics and math tutorial sessions for senior high school students as a part-time commitment. Involving in tailoring study plans for over 10 students individually on weakly basic as well as mentoring and advising students for any academic or course planning related concerns.
- Mentored over 50 students for the last 3 years of tutoring, majority of students commenced study in elite universities such as the University of Melbourne and Monash.
- Produced more than 100 content videos that were accessible online for students national-wide.

📅 Feb, 2019 — Dec, 2019 📍 University of Melbourne

BioDesign Innovative Start-up Project

- Involved in Identifying unmet needs in the biomedical field, evaluating the feasibility with business aspects.
- Endeavoured in launching a customer value-driven innovative biomedical device as a start-up with decent consideration in the product life cycle, business model and regulation.
- Constructed a PoC prototype for demonstration and result in being one of the finalists for MedTech Got Talent 2019.

Internship

● 📅 Dec, 2018 — Feb, 2019 📍 University of Melbourne

Lab Assistance, CAREN Lab

- Assisted operation on the delicate CAREN system and managed subject's safety under a professional experimental protocol.

Volunteer Experience

● 📅 Mar, 2019 — May, 2019 📍 Phillip Island

Volunteer at Free 3D Printed Hand Workshop

- Helped designing an Arduino electronic prosthetic hand at a minimal cost and offer them for free.

Extracurricular Activities

● 📅 Aug, 2018 📍 University of Melbourne

Guest Speaker

- Invited to present about "Healthcare graduate pathway" to the bachelor of Biomedicine cohort in the University of Melbourne..

Team Leader for Industrial Case Competition

- Recruited a cross disciplinary team for an industrial case competition that held in the University of Melbourne.
- Proposed a solution for repurposing a retired ExxonMobil off-shore oil rig platforms. Ceased in the semi-final round.
